12. Quick reference card.....	24

1. What this software is

This is the Boran&Co CRM. CRM stands for “customer relationship management”, which is a simple way of saying: a single place where the whole team keeps track of investors, from the first conversation all the way to a signed purchase and the commission that follows.

In one sentence: if it is not in the CRM, it does not exist. Every investor, every deposit, every contract and every payment is recorded here, so nothing is lost and everyone is looking at the same picture.

You do not need any technical knowledge to use it. You open it in a web browser (like Chrome or Safari), sign in, and click through the screens. **This guide is written for you as a administrator**, and shows the screens and tasks that apply to your account.

How to use this guide

New to it? Read the first few sections — they explain the whole idea in plain words.

Just need to do a task? Jump to “Everyday tasks, step by step”.

Stuck on something? Open the built-in Assistant in the app and type your question — it answers in plain language.

2. How the business works (the big picture)

Boran&Co connects two sides. On one side is the property developer in Baku, Azerbaijan (the “Sea Breeze” resort). On the other side are sales partners in Central Europe who find investors. Boran&Co sits in the middle and is the only party that deals with the developer directly.

An important rule about who sees whom: partners never deal with the developer, and the developer only ever sees Boran&Co. The software respects this — partners only see their own investors and their own earnings.

How the money flows

Think of it as water flowing down a series of steps. Money only moves to the next step once it has actually arrived at the one above.

1. **The investor pays the developer directly.** Boran&Co never holds the investor’s purchase money.
2. **The developer pays Boran&Co a “corridor fee”.** A percentage of the contract, paid only on money the investor has actually paid.
3. **Boran&Co keeps a share in-house** (the “retention”, for example 10%).
4. **What is left is split with the partner** who introduced the investor, at that partner’s agreed “division rate” (for example 50%).

The golden rule (remember this one)

A partner is paid only after the developer has paid Boran&Co for that money. This is called “back-to-back”.

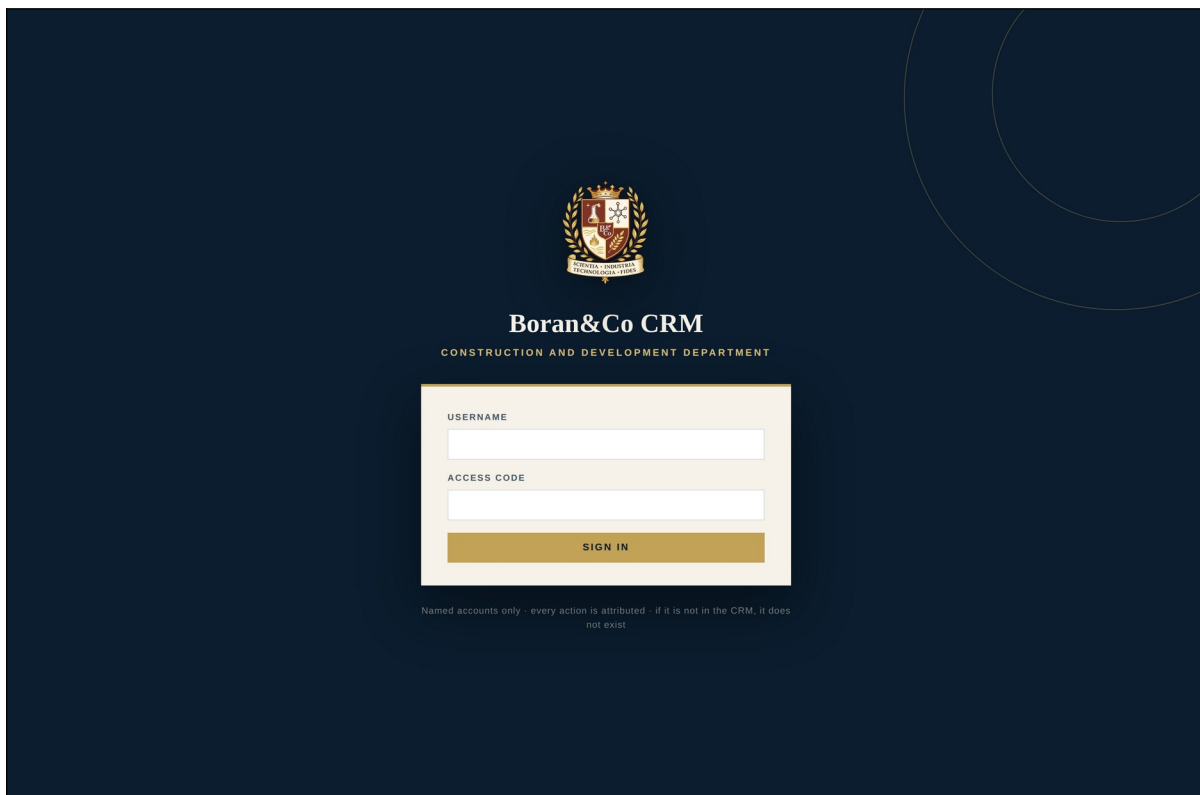

Commission is earned on money the investor has really paid — never on an introduction, a promise, or a reservation.

3. A few rules the whole system follows

- **First entry wins.** The first person to enter an investor “owns” that lead. The software blocks obvious duplicates.
- **No skipping.** A lead moves forward one stage at a time, and only when everything that stage needs is done. The screen always shows what is still missing.
- **One channel.** Everything to and from the developer goes through Boran&Co.
- **Everything is attributed.** Every action is recorded against the person who did it, with the date and time.
- **Nothing truly disappears.** Deleted items go to a “Deleted archive” where they can be brought back.

4. Signing in

Open the web address of the CRM in your browser. You will see the sign-in screen. Type your username and access code, then click Sign in.

The image shows the sign-in screen of the Boran&Co CRM. At the top center is the official seal of the Ministry of Environment, Urbanization and Climate Change of Turkey. Below the seal, the text "Boran&Co CRM" is displayed in a bold, serif font, followed by "CONSTRUCTION AND DEVELOPMENT DEPARTMENT" in a smaller, all-caps, sans-serif font. The sign-in form is a light beige rectangle with a thin border. It contains two input fields: the first is labeled "USERNAME" and the second is labeled "ACCESS CODE". Below these fields is a solid gold button with the text "SIGN IN" in white, all-caps, sans-serif font. At the very bottom of the screen, in small, light gray text, is the disclaimer: "Named accounts only - every action is attributed - if it is not in the CRM, it does not exist".

The sign-in screen. Enter your username and access code.

The software comes with two accounts to start with:

Role	Username	Access code
Administrator (full access)	anar	boran2026
Office worker	office	office2026

Please change the access codes

The codes above are just to get you started. Change them before sharing the address with anyone. You manage accounts in “Users & roles”.

If anyone forgets a code, open Users & roles, click the person, and set a new one.

5. Who does what

Every account is one of three types. The type decides what that person can see and do.

Role	What they can do
Administrator	Everything. Sees every record and also manages users, sets special terms, and empties the archive. The top-level owner.
Office worker	All the day-to-day work — leads, deals, visits and settlements. Cannot manage user accounts, set special terms, or permanently empty the archive.
Partner user	Sees and edits only their own company’s investors, and only their own commissions. Never sees other partners or Boran&Co’s internal figures.

Your account is an administrator account — the top-level owner, with access to everything in this guide.

6. The 8-stage pipeline (the heart of the system)

Every investor travels through eight stages, from first contact to a completed sale. The software calls each investor a “lead”. A lead only moves to the next stage when everything the current stage needs is finished — this requirement is called a “gate”. If something is missing, the lead’s page tells you exactly what.

Who does what: stages 1 to 5 are the partner’s job (finding and preparing the investor). Stages 6 to 8 are Boran&Co’s job (the Baku trip, the contract, and the money).

#	Stage	What it means
1	Market activation	The campaign or source that produced the investor.

#	Stage	What it means
2	Lead entry	The investor is entered into the CRM. First entry wins.
3	Qualification	Budget, type of property, purpose and timing are captured.
4	Presentation & shortlist	Properties are shown and a shortlist of units is chosen.
5	Commitment deposit	A refundable deposit is wired and the document pack is complete. The hand-over point to Boran&Co.
6	Baku visit & reservation	The investor joins a group trip to Baku, sees the site, and a unit is reserved.
7	Contract & payment	The purchase contract is signed and payments are recorded.
8	Settlement & commission	The developer pays Boran&Co, and the partner's commission is confirmed and paid.

You can see all leads laid out by stage on the Pipeline board:

Reading the board: the buyer pays the developer directly — neither Boran&Co nor the partner ever holds the purchase price. Every card carries its lane in colour — gold edge & chip = partner lane (1-5), navy =

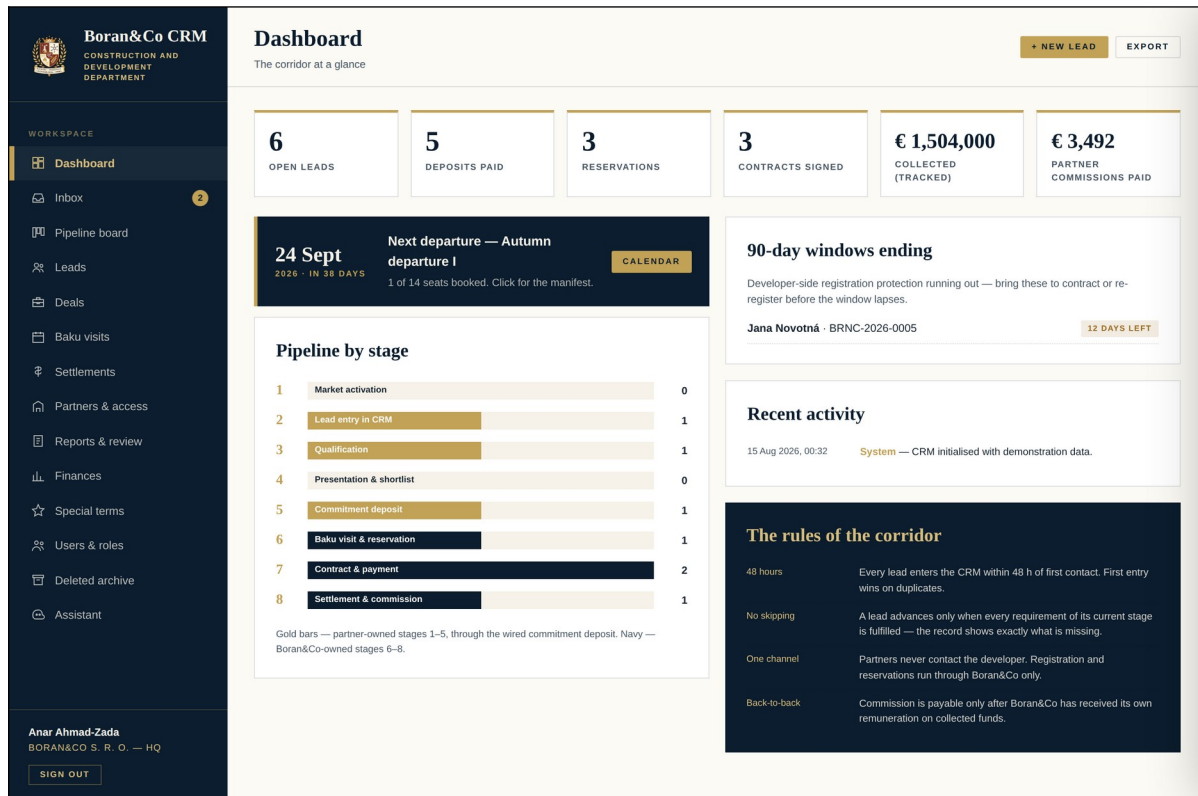

The Pipeline board — every investor shown in the stage they have reached.

7. A guided tour of your screens

The menu down the left-hand side takes you to each screen. Here is what each one is for.

Dashboard

Your starting point: a quick summary of open leads, deposits, contracts, the next Baku departure, and the rules of the corridor.

The Dashboard gives an at-a-glance overview.

Leads and the lead record

“Leads” is the full list of investors. Click any lead to open its record — a panel that slides in from the right and shows the whole journey step by step. This is where most of the work happens: qualification, the shortlist, the deposit, documents, the visit, the contract, comments and history.

A departure's manifest. After the trip, mark each traveller Attended, No-show, or Rolled to the next trip.

Settlements

This is where commission is confirmed and paid. It has four tabs:

- **To confirm** — payments a partner (or the office) has marked as paid, waiting for Boran&Co to confirm the developer has paid.
- **Overview** — the whole money picture across all deals.
- **Commission settlement** — what each partner has earned, where you issue and pay their statements.
- **Statements** — the register of every statement issued.

Boran&Co CRM
CONSTRUCTION AND DEVELOPMENT DEPARTMENT

Settlements
Paid only when the developer has paid — back-to-back

EXPORT

TO CONFIRM · 1 OVERVIEW COMMISSION SETTLEMENT · 1 STATEMENTS

Partner-marked payments waiting for your confirmation. When a partner (or the office) marks a customer payment as received, it lands here. Confirm it once Sea Breeze has remitted the corridor fee to Boran&Co — only then does the partner's share move into their payable commission.

Special terms

For one exceptional deal (say, a very large purchase), set different rates just for that deal, with a written reason. It never changes the partner's normal agreement or any other deal.

SB-PA-2026-081 · € 1,240,000 · Demo Partner k. s. · corridor 3%

DEMO PARTNER K. S.'S STANDARD TERMS

SEA BREEZE CORRIDOR RATE	3% (on the contract)
IN-HOUSE RETENTION	10%
DIVISION RATE	40%
PARTNER EARNS	1.08% of contract value

The corridor rate is the contract's standard rate with Sea Breeze; retention and division come from the partner card. All three stay in force on every other deal.

SPECIAL TERMS FOR THIS DEAL ONLY

SEA BREEZE CORRIDOR RATE TO BORAN&CO (%)	
3	
IN-HOUSE RETENTION (%)	DIVISION RATE (%)
10	40

REASON — WHY THIS DEAL IS EXCEPTIONAL *

e.g. Buyer took half the building — Sea Breeze corridor raised to 5%; revised split agreed with the partner on 12/08.

APPLY SPECIAL TERMS CANCEL

Applying special terms recalculates this deal's split immediately, notifies the partner that a revised split has been agreed, and records your name against the change. Statements already issued are not altered.

Special terms — an override for one deal, with the standard terms shown alongside.

8. Everyday tasks, step by step

This section is a set of simple recipes. Find the task you want and follow the steps.

Add a new lead (a new investor)

1. In the left menu, click Leads.
2. Click the “+ New lead” button (top right).
3. Fill in the investor’s name, city, country, email and phone.
4. Choose the campaign or source that brought them in.
5. Click Enter lead. The investor now appears in the list at stage 2.

Tip: if you are just practising, you can type placeholder text in every box. The software only blocks a new lead if the same email, phone number, or name already exists.

Move a lead through the pipeline

Open the lead (click it in the Leads list). Work down its record from top to bottom. Each stage has a “gate” — a short list of things to complete. When they are done, the lead moves to the next stage automatically. If the button to advance is greyed out, the record tells you what is still missing.

1. **Stage 3 - Qualification:** record budget, unit type, purpose and timing.
2. **Stage 4 - Presentation & shortlist:** mark that properties were shown and choose one or more units.
3. **Stage 5 - Commitment deposit:** record the deposit as wired and complete the document pack.
4. **Stage 6 - Baku visit:** book the investor onto a departure, and after the trip mark them Attended.
5. **Stage 7 - Contract & payment:** enter the contract and record payments.
6. **Stage 8 - Settlement:** confirm the developer’s payment and pay the partner.

Book a Baku trip and record attendance

1. Open the lead and find the visit step. Book the investor onto one of the four departures.
2. The deposit is a “travel-or-return” arrangement: it pays for the investor’s trip during a group departure, or is returned per the written terms.
3. Until the departure date arrives, the traveller simply shows as “booked”. You cannot mark attendance early.
4. **After the trip date,** open Baku visits → click the departure → in the manifest, set each traveller to Attended, No-show, or Rolled to the next departure.
5. **Only “Attended”** lets the lead move past stage 6.

Enter the contract and record payments

1. Open the lead and click into “Contract & payment”.

2. Enter the contract reference, the contract value, and the corridor rate for this deal.
3. **Choose how it is paid:** a single payment, or an installment schedule (several tranches with dates).
4. For a single payment you can type the collected amount in euros or as a percentage — the two update each other automatically.
5. Upload the signed contract file (part of the stage-7 gate).
6. Save. You can enter contract details before stage 7, but the software will warn you if the record is running ahead.

Get a partner paid (the payment → confirm → commission flow)

This is the most important flow to understand, and it is deliberately in two steps so that money is only paid once it has truly arrived.

1. **The investor pays the developer.** A partner (or the office) opens the deal and marks that payment as paid.
2. **It lands in “To confirm”.** Marking it paid does NOT release commission yet. It goes to Settlements → To confirm and notifies Boran&Co.
3. **Confirm the money.** Check the developer has actually paid, then click “Confirm Sea Breeze paid us”.
4. **Commission becomes payable.** Only now does the partner’s share move into their payable balance.
5. **Issue and pay the statement.** In Settlements → Commission settlement, pick the partner, issue a statement, pay it, and attach the bank confirmation. The partner sees every step on their own “My commissions” screen.

Why two steps?

Because of the golden rule: a partner is paid only after the developer has paid Boran&Co. “Marked paid” means **the investor paid**; “confirmed/cleared” means **the developer paid us**. Partners can do the first; only staff can do the second.

Add a new partner company and give them a login

1. Open Partners & access and add the partner company: its name, address, division rate and retention.
2. Then create a login for a person there — either from the company card (People / Logins), or in Users & roles → “+ Add partner user”.
3. Choose the company, set a username and an access code, and save.

Note: you can only create a partner login after the partner company exists. In a brand-new, empty system, add the company first.

Add or remove a user

1. Open Users & roles.

2. Click “+ Add ...” for the type of account you want, or click an existing person to edit them.
3. Choose the role first (Administrator, Office worker, or Partner user). For a partner user, also choose their company.
4. Set the name, username and access code, and save.
5. **To remove someone**, click Delete on their card.

Creating an account — choose the role first, then the details.

Two safety limits

You cannot delete the account you are currently signed in with.

At least one administrator must always remain. These two limits stop you from accidentally locking everyone out. Everything else you can delete freely.

Set special terms for one deal

1. Open Special terms from the menu.
2. Choose the deal.
3. Set the special corridor rate, retention, and/or division for this deal only.
4. Write the reason (required), and apply. A live preview shows how the split changes.
5. You can remove the special terms at any time to return the deal to the partner's normal rates.

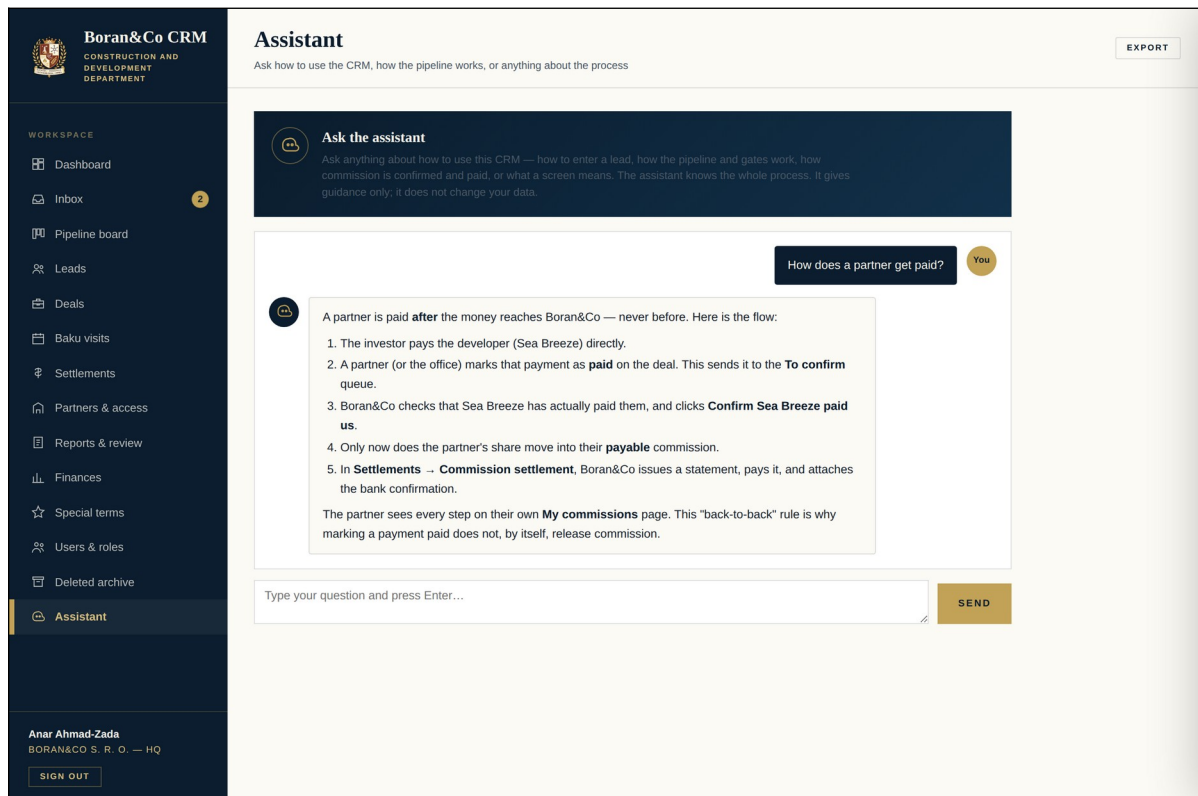

Delete something, and get it back

1. **To delete:** delete a lead from the trash icon on the Leads list, or the button inside the record. You can also delete partners, departures, statements and users.
2. **Nothing is lost:** deleted items move to the Deleted archive.
3. **To restore or remove for good:** open Deleted archive, find the item, and click Restore or Delete permanently.
4. **One exception:** a deal that is fully paid and settled is “frozen” as a permanent record and cannot be deleted.

9. The built-in Assistant

The software has its own help assistant. If you are ever unsure how to do something, open Assistant from the menu, type your question in plain words, and press Enter. It knows the whole process and answers in simple language.

You can ask things like “How do I add a lead?”, “Why hasn’t the commission appeared?”, “What does ‘awaiting confirmation’ mean?”, or “When is a deal closed?”. There are also suggested questions you can tap to get started.

The Assistant answers questions about how to use the CRM.

Good to know

The Assistant gives guidance only — it never changes your data.

If it says it is “not switched on yet”, the AI key still needs to be added — see the next section.

10. Turning on the Assistant & hosting

This section is for you as the person who sets up the software online.

Putting the software online (Vercel)

The CRM is a set of files that can be hosted for free on a service called Vercel.

1. Put all the provided files (keep the “api” and “manuals” folders) into a code repository (GitHub, GitLab or Bitbucket) and upload them.
2. In Vercel, choose Add New → Project → Import, and select that repository.
3. For the framework preset choose “Other”. There is no build step.
4. Click Deploy. Vercel publishes the site at a web address you can share.

Switching on the Assistant

The Assistant needs an AI key. The key is stored safely on the server and is never shown to users.

1. **Get a key:** go to console.anthropic.com, open API Keys, and create a key. It begins with “sk-ant-”.
2. **Add it to Vercel:** open your project → Settings → Environment Variables → Add. Name it **ANTHROPIC_API_KEY** and paste the key as the value.
3. **Optional quality setting:** add a variable named **AI_MODEL**. Use *claude-haiku-4-5* for the cheapest, fastest answers, or *claude-sonnet-4-6* for more detailed answers.
4. **Redeploy:** open Deployments, and redeploy the latest one so the new key takes effect.

Cost

Each question is a small, pay-as-you-go AI request. Haiku is the cheapest; Sonnet costs a little more but answers more thoroughly. You only pay for what is used, and only when someone asks a question.

11. Frequently asked questions

I marked a payment as paid, but the commission didn't appear. Why?

That is by design. Marking a payment paid means the investor paid; it goes to Settlements → To confirm. The commission only becomes payable after a staff member confirms the developer has paid Boran&Co ("Confirm Sea Breeze paid us").

When is a deal shown as "Closed"?

Only when the investor has paid in full and every commission statement on it has been paid. If any money or commission is still outstanding, it shows "Completed · in settlement" or "Live". A closed, settled deal becomes a permanent, read-only record.

Can partners see each other, or see Boran&Co's figures?

No. A partner only ever sees their own investors and their own commissions. Boran&Co's internal figures are never shown to partners.

Where is the data stored? Will others see what I enter?

The data is stored inside the web browser on the device you are using. That means it is not automatically shared between devices or people, and clearing the browser's data erases it. It is ideal as a working tool. For shared data across the whole team, the records would need to live on a central server.

The Assistant says it isn't switched on. What do I do?

The AI key hasn't been added yet. Follow the section "Turning on the Assistant".

I entered "placeholder" text everywhere and it wouldn't save a lead. Why?

The software blocks a new lead only when the same email, phone (six digits or more) or name already exists. Change one of those to something new and it will save.

Why can't I mark someone as "Attended" for a Baku trip?

Because the trip hasn't happened yet. Attendance can only be recorded after the departure date. Before then, the traveller stays "booked".

Can I create a partner login before creating the partner company?

No. Add the partner company first (Partners & access), then create the login. This keeps every login attached to a company.

How do I change someone's password / access code?

Open Users & roles, click the person, and set a new access code.

I deleted something by mistake. Is it gone?

No. It is in the Deleted archive. Restore it from there. Only items deleted "permanently" in the archive are truly removed.

12. Quick reference card

The eight stages

1 Market activation → 2 Lead entry → 3 Qualification → 4 Presentation & shortlist → 5 Commitment deposit → 6 Baku visit & reservation → 7 Contract & payment → 8 Settlement & commission. (Partner owns 1-5, Boran&Co owns 6-8.)

The golden rules

- ✓ A partner is paid only after the developer has paid Boran&Co (back-to-back).
- ✓ Commission is earned on money actually paid — never on a promise.
- ✓ First entry wins; no skipping stages; everything is attributed; nothing is truly deleted.

Payment states

Due (not paid) → **Marked paid** (investor paid; waiting for us to confirm) → **Cleared** (developer paid us; commission now payable).

Starting accounts

Administrator: anar / boran2026. **Office worker:** office / office2026. Change these before sharing the link.

A note about data (please read)

This build stores its records in each browser's local storage. Records are therefore per-device and are erased if the browser's data is cleared. It is well suited as a working tool for one machine or a small, coordinated team.

When you are ready for shared data across many people and devices, the records need to move to a central server. That is the natural next step.

— End of guide —
